PROFESSIONAL SUMMARY

Technology professional with hands-on experience in full-stack development, corporate integrations, and automation for IT environments. Experienced in developing and supporting an internal platform using Java, Spring Boot, React, TypeScript, PostgreSQL, Docker, and REST APIs, as well as integrations across ITSM, monitoring, and observability platforms. Works with end-to-end troubleshooting, logs, authentication, payloads, databases, Linux CLI, Git, and automated incident lifecycle flows. Versatile profile with strong learning ability, an internal-product mindset, and a focus on stability, traceability, and reducing manual work.

PROFESSIONAL EXPERIENCE

ZivaSec Tecnologia e Soluções — Grupo NTSec | São Paulo, SP

IT Support Technician I — Software Development, Integrations & Automation (Hybrid) | Mar 2026 – Present

- Develop and support an internal platform for corporate integrations, reporting, automation, permissions, scheduling, approvals, operational history, and automated email delivery.
- Implement full-stack features with Java, Spring Boot, React, TypeScript, PostgreSQL, Docker, and REST APIs.
- Build and maintain integrations across ITSM platforms, corporate systems, and monitoring/observability tools.
- Develop webhooks and automated flows for incident creation, updates, and closure based on monitoring events.
- Perform end-to-end troubleshooting across APIs, authentication, JSON payloads, databases, permissions, logs, and Linux environments.
- Support deployments, Git/GitHub workflows, emergency fixes, staging/production validation, and continuous process improvement.

Technology & Integrations Apprentice (On-site) | Apr 2025 – Mar 2026

- Worked hands-on in the development, maintenance, and evolution of internal solutions focused on corporate integrations, automation, and operational support.
- Supported automated flows between service platforms, monitoring tools, and corporate systems.
- Developed and adjusted scripts, webhooks, integration routines, technical documentation, payload validation, and log analysis.
- Contributed to internal modules for reports, templates, presets, approvals, permissions, and delivery history.
- Supported technical incident troubleshooting, database validation, API testing, and production fixes.

RELEVANT PROJECTS

Internal corporate integrations platform

Java, Spring Boot, React, TypeScript, PostgreSQL, Docker, REST APIs

- Developed a modular web platform to centralize integrations, reporting, automation, templates, scheduling, approvals, permissions, and operational history.
- Built modules for reports, preset-based configuration, automated email delivery, and internal workflow tracking.
- Integrated corporate APIs including authentication, pagination, error handling, data normalization, persistence, and log-based traceability.

Integrations between ITSM platforms and corporate systems

REST APIs, Webhooks, JSON, Linux CLI, Logs

- Developed and maintained integrations that synchronize tickets across corporate service platforms.
- Handled creation, updates, status, links, business rules, deduplication, custom fields, and payload validation.
- Supported integrations in Linux environments through log analysis, API testing, issue resolution, and technical documentation.

Monitoring-driven incident automation

Webhooks, REST APIs, Monitoring, Observability, ITSM

- Built webhooks to automatically create, update, and close incidents from monitoring events.
- Implemented conditional rules to preserve human handling when an incident was already in progress.
- Handled authentication, required parameters, tags, event links, HTTP responses, logs, and integration exceptions.

TECHNICAL SKILLS

- Back end & APIs: Java, Spring Boot, REST APIs, JSON, authentication, logs, and error handling.
- Front end: React, TypeScript, JavaScript, Vite, HTML, CSS, and responsive interfaces.
- Databases: PostgreSQL, MySQL, SQL, queries, data validation, and basic data modeling.
- Integrations: Webhooks, ITSM platforms, monitoring/observability, and incident automation.
- DevOps & operations: Docker, Docker Compose, Linux CLI, Nginx, Git/GitHub, and troubleshooting.

EDUCATION

- ETEC Takashi Morita — Industrial Automation Technician, 2023–2025
- CEAP — Centro Educacional Assistencial Profissionalizante — IT Technician, 2023–2024

CERTIFICATIONS, AWARDS & RECOGNITION

- Network Defense — Cisco Networking Academy, 2025
- Technical Networking Track Exam — Cisco Networking Academy, 2025
- IT Security — Fundação Bradesco, 2025
- Python: Object-Oriented Programming and Projects — Fundação Bradesco, 2025
- Blockchain Fundamentals — ISACA, 2024
- FECEAP Winner — web app with map/heatmap using JavaScript, MongoDB, and Google Maps API.
- Outstanding Student — CEAP, 2022.
